

SHUBHRANSHU PATTANAIAK

DevOps Engineer | Site Reliability Engineer | Platform Engineering

7735406476 | shubpatt@gmail.com | linkedin.com/in/shubhranshu-pattanaik-12ty | Bangalore, India

PROFESSIONAL SUMMARY

DevOps Engineer with 3 years of experience in platform engineering, DevOps, and site reliability, currently at A.P. Moller Maersk owning 50+ production backend services running on Kubernetes. Hands-on across cloud infrastructure (AWS, Azure), GitOps-driven CI/CD with YAML-based pipeline automation, Infrastructure-as-Code (Terraform, Ansible), and observability tooling (Prometheus, Grafana, Loki, Alertmanager). Practiced in DevSecOps (Trivy, SonarQube, HashiCorp Vault), SLI/SLO-driven on-call reliability, and Azure FinOps cost optimization. Track record of reducing MTTR by 35%, improving deployment efficiency by 50%, and sustaining a 99.9% deployment success rate through automation and operational toil reduction. Strong foundation in Linux, Data Structures & Algorithms, and Object-Oriented Programming. Seeking DevOps / SRE / Platform Engineer roles with end-to-end ownership of cloud-native infrastructure.

TECHNICAL SKILLS

Languages: Python, Java, SQL, Bash/Shell Scripting

Cloud Platforms: Amazon Web Services (AWS), Microsoft Azure

Containers & Orchestration: Kubernetes, Docker, Helm

Infrastructure as Code: Terraform, Ansible

CI/CD & GitOps: GitHub Actions, Jenkins, GitOps, YAML Pipeline Scripting, SonarQube Quality Gates

Observability & SRE Practices: Prometheus, Grafana, Loki, Alertmanager, SLI/SLO Management, On-Call Incident Response

Security & DevSecOps: Trivy, HashiCorp Vault, Harbor, GHCR, Container/Secrets Security

FinOps & Cost Optimization: Azure Resource Rightsizing, Usage-Based Decommissioning, Cost Governance

Databases: SQL Server, PostgreSQL, MySQL, Oracle PL/SQL

Operating Systems: Linux (Ubuntu, CentOS, RHEL), Windows Server

Version Control: Git, GitHub

CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems

WORK EXPERIENCE

Software Engineer - DevOps / SRE (Backend Platforms & Reliability)

A.P. Moller Maersk - Bangalore, India | Jul 2024 - Present

- Own and operate 50+ production backend services across 100+ Kubernetes clusters and Linux systems, handling deployments, scaling, pod-level debugging, configuration management, and live incident resolution.
- Design zero-downtime CI/CD pipelines using GitHub Actions and YAML-based workflow definitions, enforcing SonarQube quality gates for code merge, following GitOps principles - sustaining a 99.9% deployment success rate.
- Provision and maintain environment-specific infrastructure using Terraform and Ansible (Infrastructure-as-Code), automating deployment workflows to cut environment setup time and improve deployment efficiency by 50%.
- Maintain and set up Oracle PL/SQL and SQL Server scripts and stored procedures for database provisioning, supporting application and environment configuration across multiple projects.
- Implement container image scanning with Trivy across Harbor and GHCR registries, and manage secrets for containerized deployments using HashiCorp Vault.
- Define and monitor strict SLIs/SLOs, and implement dashboards and alerting with Prometheus, Grafana, and Loki, increasing system visibility and reducing incident response time.
- Lead on-call rotations, diagnosing and resolving production-critical incidents impacting live operations, improving Mean Time to Resolution (MTTR) by 35%.
- Drive FinOps cost optimization for Azure resources, analyzing historical utilization metrics (RAM, I/O, throughput, and more) to identify rightsizing and decommissioning opportunities.
- Partner with application teams on release management and post-incident reviews, embedding reliability practices early in the development lifecycle - contributing to a 25% reduction in post-release incidents.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

SOA University - Bhubaneswar, India | Jul 2020 - Jun 2024

CERTIFICATIONS

- AZ-900: Microsoft Azure Fundamentals - Microsoft

KEY ACHIEVEMENTS

- Received Spot Award at A.P. Moller Maersk in recognition of outstanding contributions to backend platform reliability and DevOps engineering.
